Advanced Sewer Products

The Background

ASP is a manufacturer and wholesaler of a range of pipe and sewer sealing plugs. The company now has distributors in Ireland, France, Germany, Spain, Czech Republic, Norway, Denmark, Sweden, Kuwait, Hong Kong and Australia.

The Support

RiDO has supported Advanced Sewer Products since the company was launched. This has involved support with **business planning**, applying for **export grants** and on a range of **HR issues** through the JOBMATCH scheme.

"I am confident that we will continue to grow. One of the best things about the support that we've received is that it has been tailored to meet our needs. RMBC don't simply offer standard packages, they work with businesses on an individual basis and are genuinely committed to helping companies become successful. It is a true partnership."

Michael Flanagan, Managing Director
